King George V Dies at Sandringham Monday

Sandringham, Jan. 21 — Great Britain's beloved King George V died peacefully Monday night just before midnight.

The 70-year-old monarch was unconscious at the end.

Queen Mary, the Prince of Wales and other members of the Royal family and the Archbishop of Canterbury were at the bedside when he died at 11:55 p.m. (4:55 p.m. Crossfield time.)

A sudden four-day illness caused King George's death. He suffered an attack of bronchial catarrh, accompanied by heart weakness.

Weeping the Queen was led away, supported by her 41-year-old son — the new King — and the chamber was darkened.

King George's Funeral Will Be Held Tuesday

Public Holiday Throughout the Empire — Memorial Service at Crossfield — Schools and Business Places to Close.

The funeral of King George V will be held Tuesday, January 28, in St. George's Chapel of Windsor Castle.

The body will be in state in Westminster Hall from Thursday until the time of the funeral.

A full state procession will accompany the casket from Westminster Hall to Paddington station from where it will be taken to Windsor.

A public holiday has been declared in all parts of the Empire, and in Crossfield the schools and business places will be closed. A memorial service will be held in the U.F.A. Hall that day at 3 p.m. All residents of Crossfield and district are invited to attend this service. The usual Wednesday half-holiday will not be observed on January 29, owing to the King's funeral on Tuesday.

Heywood Given Light Sentence

Arthur Heywood, Crossfield truckman, was sentenced to three months' imprisonment by Mr. Justice Frank Ford at the criminal assizes Wednesday on a charge of resisting arrest.

As the sentence will date from the time of Heywood's arrest on November 15, 1935, he will have only a short time to serve.

Heywood was alleged to have attempted to main Corporal D. Cameron by firing two shots in his direction. Corporal Cameron had attempted to arrest the accused who, allegedly, had made threats to kill William McKay of Crossfield because he took Heywood's wife to a dance. The jury, however, found Heywood only guilty of resisting arrest.

"Will any resentment against William McKay affect Heywood's conduct?" Mr. Justice Ford asked J. J. O'Connor, counsel for the prisoner.

"I do not think so," Mr. O'Connor replied. "If I did I would consider it my duty to inform your lordship."

Mr. Justice Ford said that despite the fact that some people might consider he was extremely lenient, he would take into consideration all the circumstances of the case and gave a light sentence.

It was pointed out that Heywood had borne an excellent reputation throughout his life; that he and his wife were reconciled; and that he had seen the error of his ways.—Calgary Herald.

On Wednesday morning Jan. 22 Helen Sharp who lately had her tonsils removed suffered a haemorrhage, which resulted in such a loss of blood as to necessitate her removal to the hospital in Calgary.

A. S. GOUGH

Reeve of the M. D. of Rosebud for the past eight years and a Councillor of long standing, will have a gratifying financial statement to submit to the ratepayers showing the strong financial position of the Municipality.

The M. D. of Rosebud are to be congratulated on having an experienced Council to whom in no small measure is due the satisfactory financial standing of the District in these days of depression.

Annual Meeting Municipal District of Rosebud Saturday, February 15

The annual meeting of the Municipal District of Rosebud will be held at Carstairs on Saturday, Feb. 15th at 1 p.m.

The financial statement is now in the hands of the printer and will be issued shortly to the ratepayers.

Burns' Anniversary

Plans are now practically completed for the annual Burns' Anniversary, and it is expected that a second crowd will be on hand.

A fitting tribute will be made during the evening to the memory of His Late Majesty King George V. Come and bring a friend.

Memorial Service at United Church

With sorrowing hearts for the great loss which has come to our Empire and to the world in the death of our beloved Sovereign King George V, a Memorial Service will be held in the United Church Sunday evening January 26 commencing at 7:30 p.m.

Mrs. McMillan Wins Main Event

The mixed bonspiel concluded on Monday, Mrs. C. H. McMillan won the Grand Challenge, defeating E. Patchell in the final by a score 10-7. H. Ballam took home the bacon in the Consolation disposing of Mrs. A. Stevens by a score of 14-4.

Nineteen rinks competed in thespiel. Two prizes were offered in each event.

Personnel of winning rinks:
Grand Challenge

Mrs. C. H. McMillan, Wm. Stralo, John Chalmers, Geo. Lim 9

Fred Patchell, Mrs. T. Tredaway, Ben McLeod, Donald Hopper 7

Consolation
H. Ballam, S. Reid, L. Nichol, Johnnie Carmichael 14

Mrs. A. Stevens, A. A. Hall, A. Hough, Mrs. J. Belsaw 4

Stanley Pogue President

Native Sons and Daughters

At a recent meeting of the Native Sons & Daughters Association the following officers were elected for 1936: President, Stanley Pogue; Vice-President, Miss Helen Willis; Secretary-Treasurer, Evan Gordon.

The date of the annual dance and entertainment will be announced later.

Mrs. O. Bills is in Edmonton this week attending the U.F.A. and the U.F.W.A. Convention as a delegate from the Floral Local.

The prizes in connection with the grand raffle in aid of the Midger Baseball League are now on display at the Oliver Cafe. See George and get your tickets today.

Death Stalks The Highway

A recent announcement of the intention of the Federal department of transportation to conduct a campaign to reduce the annual toll of life and limb taken by automobiles and trucks on the highways and roads of Canada should be welcome news to all who use motor-driven power for business or pleasure. The campaign comes none too soon.

Statistics, just published, reveal that in the United States last year over 36,000 lives were lost by accidents in which automobiles and their drivers were the agents of death, in addition to an appalling number who were injured in greater or lesser degree. This means that, roughly, one out of every 3,500 persons in the U.S.A. perished by the automobile in 1935.

No doubt, when the figures are published, it will be found that the automobile accident death rate in Canada for 1935 was comparable to the American loss after allowing for the difference in population of the two countries and the lesser condensation of traffic. In 1934 the Canadian automobile casualty list totalled 1,108 deaths and 17,998 injured, some slightly.

Had 36,000 lives been snuffed out and hundreds of thousands injured in a single avoidable catastrophe in the United States last year, the nation would have gasped with horror. There would have been demands for investigation and the imposition of safeguards to prevent the possibility of recurrence of such an overwhelming catastrophe, but because these deaths and injuries represent nearly as many individual accidents distributed throughout the year and scattered over a wide geographical area, it has been customary to dismiss them with a shrug of the shoulder and a comment about "some fool driver," except by the bereaved relatives and friends.

However, there are indications that citizens of the United States are becoming aroused at a condition of affairs which has become a national menace. This growing concern is largely due to efforts of government agents, corporations, police authorities and the newspapers, to acquaint the public with the facts and to drive home the risks which foolhardy and negligent motorists incur by their conduct on the roads.

Already, it is reported, that these efforts, supported by an aroused public consciousness of individual responsibility, is bringing results in sections of the country where intensive campaigns have been staged.

There is reason to assume that similar results can be achieved in Canada, if organizations and individuals will rally to the support of the authorities who have decided that the time has come when an organized effort must be made to minimize the hazards created by recklessness and carelessness.

Recklessness and carelessness, in the final analysis, are the two factors responsible for the great majority of deaths and injuries on the highways on this continent, on either side of the international boundary.

For many of the accidents that occur on country roads and city streets recklessness must be indicted, and very often criminal recklessness. In this category falls the driver who travels at greater speed than road, climatic or traffic conditions warrant, the driver who passes other traffic near the crest of a hill or on a curve, the driver who cuts in front of another too soon and the driver who beats the train to the crossing.

With respect to the last-mentioned hazard it is interesting to note that figures just secured from the records of the board of railway commissioners show that in 1935 there were 242 automobile accidents at railroad crossings in Canada, resulting in the death of 114 and injuries to 304, an increase of 28 in the number of similar accidents in 1934, an increase of 33 in the number of deaths and 42 in the number of injuries.

Carelessness, too, must be marked up as the contributing factor for a large number of these accidents. It may be carelessness while the wheel is in the hands of the driver on the road. It may be carelessness in parking on a road in the dark with lights out. It may be negligence in failing to regularly and carefully inspect the brakes, the tires and the lighting system or in remedying defects when discovered.

And last but not least there is alcohol. Tests by medical authorities and scientists have demonstrated conclusively that the man carrying only a single drink is not as alert as he is normally without it and the man with several drinks inside him is a positive menace to himself, his passengers and those whom he meets or passes.

Alcohol, according to authorities, "plays a major part in the appalling list of accidents on this continent." This is recognized in the posters which are being prepared for distribution as part of the federal government's campaign to ensure greater safety to the users of Canadian highways, one of which reads: "If you must drink, don't drive. If you must drive, don't drink."

Synthetic Radium

Cornell University Builds Machine To Produce Rare Agent

At a cost of \$5,000 Cornell University has a machine capable of making artificial radium as a substitute for the real stuff, which cost \$40,000 a gram.

Completion of this machine, a cyclotron, the second of its kind in existence, was announced at Ithaca, N.Y. The Cornell cyclotron is already in operation.

The original cyclotron, a machine which uses a 200,000 90-ton magnet to produce 10,000,000 to 15,000,000-volt rays was made by Dr. E. A. Lawrence at the University of California.

Distinguishing goats from sheep is not always easy, for among the various forms there are some quite confusing to the expert eye.

No wonder Purity Flour is a favorite for bread. Its richness in nourishing gluten is supplied by Western Canada hard Spring wheat. A strong flour that goes farther—economical.

A Young Man's Country

Success Can Be Achieved In North States Colonel Cornwall

"The north is coming into its own at last," declared Col. James K. Cornwall, who was in Edmonton recently.

"Peace River Jim" looked into the future and prophesied: "It's a young man's country, a big empire, and surely will prove the salvation of Alberta."

In eastern Canada, where the impulse for northern development has its principal momentum, they are alive to our mineral prospects. While the mineral country is mostly north and east of Alberta, transportation facilities and water routes give Edmonton a strategic advantage over other cities.

"Edmonton is in the same position as regards northern mineral development as Toronto was 25 or 30 years ago, and in my judgment, can repeat the mineral history of that city," he asserted.

"This northland of ours is a young man's proposition," he proceeded. "It includes perhaps the greatest extent of virgin mineral country in the world. If youth will face north, it will find success and its future there."

"Forget you have no job. Perfect yourself as much as possible, physically and mentally, and then go north. There will you find your place."

French Query Service

Post Office Charges Different Prices For The Varying Questions

If you happen to be in France and want to know the date America was discovered, how to make good coffee or obtain a quick divorce, just dial S.V.P. on your telephone.

You will be answered by one of the employees of the new "If you please" service, just instituted by George Mandel, Minister of Posts and Telegraphs, Paris. At any hour of the day or night, M. Mandel's encyclopaedians will reply. Ordinary questions are answered for a sum of 6 to 15 cents. Twenty to 30 cents are charged for more difficult queries, and special terms are made for a real "poser."

You can also have an errand run by a postoffice cyclist who will deliver you drinks, flowers and anything you like to any address. This will be charged for at the rate of 35 cents in the day and 70 cents at night.

It is expected that plenty of practical jokes will be put, dedicate questions to the new service. But the better the joke, the higher the bill.

Institution For Beggars

Scholars Taught The Correct Places And Manner To Beg

A "beggars' academy" has been discovered by the police of Pilsen, Czechoslovakia, the famous beer city.

An empty barn in the nearby village of Slavkov was the seat of that institution which had two adult instructors and twenty-six boy "scholars."

The teachers told their pupils how to look miserable and "maimed," and how to behave as "blind," "dumb-and-deaf." Practical exercises were held, and crutches, bandages and other beggar's appliances were purchased at general prices.

Lessons were also given for writing begging letters, and instructions were given where and how the individual boys had to beg.

The booty was handed over to the teachers, who retained one-half and distributed the other half among the boys.

New Plating Alloy

Looks Like Pure Silver And Does Not Discolor

Development of a non-tarnishing plating alloy of silver and tin has been announced by Professor Lawrence E. Stout, of the Washington University chemistry department at St. Louis. The new alloy, composed of 30 to 40 per cent silver and the rest of tin, looks like pure silver, polishes as well, wears better and does not discolor.

Footwear For Dobbin

Twenty per cent more horseshoe nails have been sold in Canada this year than last. This either indicates that good old Dobbin is "coming back" or that he is getting more particular about his footwear. Either explanation points to better times.

Must Carry Lights

Pedestrians in Normandy France, must now carry lights at night. The county council has ordered that any one walking along unlighted high ways must carry a lantern, so that they will not get run over.

A camel cannot go without water longer than three days, without losing strength. 2134

Victoria May See Bluenose

Captain Walters Considering Proposition To Visit Pacific Coast

Bluenose, queen of the fishing fleets, may leave her Atlantic home at Lunenburg, N.S., next summer to visit Canada's Pacific coast for the first time.

Captain Angus Walters, skipper of the racing schooner, said he was thinking over a proposition from a Victoria sportsman for a Bluenose cruise along the British Columbia waters, but he hasn't made up his mind yet.

If he takes it up, the Pacific cruise will be Bluenose's longest voyage in her 13 years of fishing, racing and barnstorming.

Two years ago Captain Walters took her to the Great Lakes for the summer—her first taste of fresh water—and last year he went to England with her. That last voyage was the longest so far.

At came close also to being Bluenose's last. On the way home she ran into a blow that almost sent her to the bottom and drove her reeling back to England for repairs that took three weeks.

But about the Pacific jaunt. "Well," says Angus, "I don't know. They paint a pretty rosy picture, but we'd have to sail six or seven thousand miles to get there. Anyhow, we'll see."

Bluenose is ready for the trip. After a thorough going over on her return to Lunenburg, she is as seaworthy and fast as ever, Captain Walters believes.

Pioneer Newspaper Woman

Faith Fenton, Who Wrote Of Yukon Gold Rush, Dies In Toronto

Faith Fenton, pioneer Canadian newspaperwoman whose accounts of the 1898 gold rush in the Yukon thrilled readers of Canadian papers, died at her home in Toronto after a brief illness with pneumonia. In private life she was Mrs. John N. E. Brown, wife of a well known physician of Toronto. They were married in the little log church at Dawson on the first New Year's Day of the 20th century.

Dr. Brown had gone in with the first civil commissioner of the Yukon and was the first secretary of that territory. Faith Fenton was there in a dual capacity. At the suggestion of Lady Aberdeen, wife of the governor-general, she joined the field force of the Victorian Order of Nurses. But she also had been commissioned to write articles for a Toronto newspaper.

She obtained permission from the government to remain in the Yukon to write. One of her most famous experiences concerned a hanging. It was scheduled for eight in the morning but the courier left for the south at seven. Faith Fenton wrote her story and sent it off.

Then it was remembered it was a saint's day, the hanging was postponed and finally called off. With the help of police she got a half-breed runner who caught up with the courier several days later.

Need More Accommodation

Olympic Village In Germany Is Considered Too Small

Germany's Olympic committee, in charge of arrangements for the 1936 international sports contest to be held in the Reich, conferred with the war ministry to consider additional accommodations for athletes from 48 nations, the committee learning that the nearly completed Olympic village is far too small.

Depends On Ancestors

The farm flock keeper is rarely if ever justified in keeping hens longer than to the end of the second laying year. But to keep them even that long without a death loss that cuts seriously into profits, it is essential to have flock ancestors that have laid numerous large eggs for three or more years.

The annual journey of the earth around the sun covers approximately 584,600,000 miles.

BACKACHE

IF you have backache, dizzy spells, headaches, do not neglect your kidneys. Take Gin Pills for prompt relief at the first sign of these symptoms. You will feel better, look better—be better, if your kidneys are functioning properly.

GIN PILLS

Climb on the Band-Wagon

Join the cheering thousands of "roll-your-owners" who are stepping up their smoking pleasure by getting back to Ogden's.

You owe it to yourself to enjoy Ogden's Fine Cut, and you can, when it costs so little! Ogden's rolls best of course, with the best papers—"Chanticleer" or "Vogue".

OGDEN'S FINE CUT
Your Pipe Knows Ogden's Cut Pipe

Terror Of The Air

New Torpedo Can Travel Four Times Farther Than Fastest Shell

An aerial torpedo, or flying projectile, which can travel four times the distance of the fastest shell ever known, is one of two inventions, which may revolutionize warfare.

It is the invention of a young man who, working unobtrusively in a laboratory at Queen Mary's College, London, England, is fast becoming recognized as the Marconi of the aeronautical world.

He is Phiroze P. Nazir, aeronautical research student for the Government of India, who although only in his twenties, has already several astonishing inventions to his credit.

His researches make him a person of extraordinary interest to the representatives of other governments, many of which would be glad to know a few of the technical secrets which he has locked up in his brain.

The German Big Bertha could send a shell only fifty miles.

Mr. Nazir claims that his flying projectile, travelling on its own fuel, without a pilot, could travel up to 300 miles at a speed of 300 miles an hour, and could be made to drop at any predetermined distance according to the amount of fuel placed inside.

This weapon would enable an air attack to be staged without warning.

Another far-reaching invention is a system of secret guns concealed in the tail of an aeroplane.

The guns are so arranged that immediately another plane comes behind within firing distance it is shot down before it has time to shoot.

A plane of this description, says Mr. Nazir, could attack a whole squadron and produce chaos among them.

SELECTED RECIPES

CRISP COOKIES

Temperature: 400 degrees F.
Time: 15 minutes
2 squares unsweetened chocolate
¼ cup shortening
¼ cup sugar

¼ cup "Crown Brand" Corn Syrup
2 eggs, unbeaten
¼ cup flour

¼ cup Benson's Corn Starch
¼ cup vanilla
¼ cup finely chopped nuts

Method: Melt the chocolate in the top of a double boiler. Remove from heat and add the shortening, sugar, "Crown Brand" Corn Syrup, eggs, Benson's Corn Starch and vanilla, beating the whole mixture thoroughly, being sure the eggs are added one at a time. Spread the mixture on baking sheets which have been oiled with Mazola. Sprinkle with nuts and bake in a hot oven. Cut while warm. These cookies are very crisp and easily made.

Wainwright Buffalo For Germany

"Twenty Canadian buffalo cows are going" to Europe in an effort to save that continent's bison from extinction, Interior Minister Cramer disclosed. The Canadian bison, living in the Wainwright, Alta., buffalo national park, will be taken to Germany by Luis Heck, director of the Berlin zoological gardens who has taken a leading part in efforts to save the European bison.

Old Publishing Firm

A recovery of 450 years in the possession of the same family is being celebrated by the publishing firm of Faber & Co., Madgeburg, Germany. Their first publication was the "Psalms of David," which came out in 1488.

Study Cosmic Ray

Scientific Effort To Be Made To Penetrate Mystery

Dr. Arthur Holly Compton, University of Chicago physicist, and Nobel prize winner, announced the inauguration of world-wide scientific effort to penetrate the mystery of the cosmic ray.

He said he would leave for Vancouver, B.C., to install a cosmic ray meter aboard the S.S. Orangi as one phase of the observations, which will be conducted in widely-scattered regions of the globe.

The enterprise, Dr. Compton said, has two goals. The first was an explanation of the daily variations in the intensity of cosmic rays. The second was to find out whether the rays, powerful enough to go through 292 feet of lead, had greater intensity in the northern than in the southern hemisphere.

DO YOU NEED A BUILDER?

WHEN you're miserable and perhaps in need of a good tonic, weight below normal, and you feel tired-out and weak, follow the advice of Mrs. Francis Allcott of 242 Sackville St., Toronto, Ont., who remained fit and well by using Dr. Pierce's Golden Medical Discovery as a tonic. It was of great benefit to her to relieve stomach trouble such as indigestion and sour stomach, and seemed to tone up her entire system. This tonic gives one a fine appetite, tone, and strength of the whole system. I know of no better medicine for its purpose. Buy now at drug stores. New size, tablets 50 cents, liquid \$1.00. Large size, liquid \$2.00.

Had Good Excuse

"Annie Mae," said the mistress of the house, finally giving way to curiosity, "I notice you have been taking our empty grapefruit hulls home with you. What do you do with them?" The negro maid looked up at her mistress with a sheepish grin. "Yerum," she admitted, "The been carrying 'em home. I think they make my garbage look so stylish."

How To Become Efficient

To win fame and fortune in your business, says Prof. Howard W. Haggard, of Yale University, eat five or six times a day instead of two or three. He explained tests showed workers are more efficient the first three hours after eating.

ARE YOU NERVOUS, IRRITABLE, TIRED?

Do your friends secretly pity you, because you simply have not energy enough to do the things they do? Are you nervous, irritable, a victim of sleeplessness? Then the sooner you take PHOSPERINE the better. PHOSPERINE, the great British tonic, concentrated energy. You take only a few tiny, economical drops each day... but the effect is astonishing.

Almost from the first dose life looks brighter. You gain new energy. You sleep soundly. You wake thoroughly refreshed. Indigestion, loss of appetite, pains and stiffness, and utter weariness go... and stay gone.

Start taking PHOSPERINE now. Thousands who once suffered from general debility, rheumatic aches and pains, poor appetite and lack of pep and go, count the day they first took PHOSPERINE as the best day in their lives.

PHOSPERINE is splendidly effective at all ages for combating fatigue, sleeplessness, general debility, retarded convalescence, nervous, anaemic condition, indigestion, rheumatism, grippe, neuritis, neuritis and loss of appetite. Get PHOSPERINE from your druggist now—in liquid or tablet form—at the following reduced prices—3 sizes, viz. \$1.00, \$1.50. The \$1.00 size is the nearly four times the size and the \$1.50 size is twice the \$1.00 size. 23

Fire Hazards On Farms Can Be Reduced When Proper Precautions Taken

While every person should enlist in the army of fire preventionists, farmers especially should be careful to prevent fires, says a bulletin authorized by Hartley D. McNair, Ontario superintendent of insurance. There is little or no protection on the farm and when a fire starts it is usually a total loss which can never be replaced and the policyholders are the ones who pay for it in the insurance rates assessed. The loss from farm fire is far greater, too, than the amount of the insurance loss; food supplies are lost; farm families are made homeless, and even industries which depend on the farmer for raw material are affected.

Most farm buildings are of wood, constructed with little thought for fire safety. The buildings of an inflammable nature and the hay, grain, straw, food and other materials stored and handled on farms, are an easy prey to fire once it passes the incipient stage.

Statistics show that the majority of farm fires are due to combustible roofs, defective chimneys and heating apparatus, lightning, threshing, lanterns, gasoline, and spontaneous combustion.

Many of the methods which have been successful in preventing or controlling fires in urban districts are equally as effective in preventing fires on the farm. Practically every roof fire is preventable and with a comparatively small outlay of money farm dwellings can be rendered immune from this dangerous hazard.

A farmer cannot be expected to remove good wooden roofs, but when a building needs a new roof, or when new structures are erected on the farm, a fire-resistant roof should be installed.

Where a farmer is financially unable to immediately protect his buildings with fire-resistant roofs, an effective agency against roof fires is the spark arrester, which attached to the chimney stands on guard every hour of the day or night. A ladder and fire extinguisher also afford cheap protection against roof fires.

The loss from stoves, furnaces, pipes and chimneys could be eliminated by proper construction of chimneys, replacing worn-out pipes, and a more careful use of stoves and furnaces. During the winter season, the heating system of the farm home will be under a long strain and defects will become dangerous and destroy the home if not detected and repaired.

To the efficiency of the lightning rod is attributable the marked reduction in losses due to lightning during recent years. In addition to the security and peace of mind afforded by this means of protection, insurance rates are much lower where buildings are rodged.

The introduction of modern machinery on the farm while lightening the burden of the farmer has also tended to increase the fire hazard, particularly at threshing time. The attitude of most farmers that, as they have never had a loss by fire, their property is fire-proof, is shattered by the fact that the losses due to threshing operations constitute five per cent of the total farm fire loss.

No one should smoke or carry matches around the barn during threshing operations. A liberal supply of water should be kept at hand, a ladder of sufficient height to reach the eave of the barn, at least one dry powder fire extinguisher at the engine and a further supply in the barn. Straw or litter should not be allowed to collect around the engine, which should not be operated without a spark arrester.

A spraying device is now being used effectively by a number of threshers. By means of this equipment a fine spray of water is forced into the blower when threshing. This spray, which does not injure the straw, assists in preventing seeds from blowing, the amount of dust is reduced, barns are cooler when threshing in early fall and the fire hazard is eliminated.

Lanterns used in farm buildings should be hung on hooks or wires. As a precaution against fire should the lantern be knocked down or upset, a simple device may be attached to the stem of the lantern, which will immediately extinguish the flame.

In storing hay it from 3 to 10 pounds of salt per ton is sprinkled on the hay to patibleness is improved and the danger of heating is lessened.

The rural communities which have at their disposal the protection of a rural or urban fire truck are fortunate indeed, as many serious farm fires have been averted through their efforts.

Some of the fire hazards on the farm may exist at all times, while others occur at certain seasons of the year. It is, therefore, necessary for the farmer to be always on the alert that these fire hazards may be recognized, eliminated or guarded against, it is to prevent the possible destruction of his property from fire.

Housing Plan

Dominion-Wide Scheme To Promote Building And Reduce Unemployment

A Dominion-wide plan to promote building activity and reduce unemployment was studied by leading Montrealers. The plan is being submitted throughout the country by Hon. Charles Stewart, minister of the interior in the former King cabinet, and Mervin Brown, ex-mayor of Medicine Hat, Alta. It is understood to have the approval of Hon. C. A. Dunning, minister of finance.

The plan would make effective use of the Dominion Housing Act and those behind it are united in the "Prosperity Housing Association."

Mr. Stewart and Mr. Brown outlined the scheme to Mayor Houtte and other prominent citizens who themselves chose a tentative Montreal sub-committee as follows: C. P. Sise, president of the Bell Telephone Company of Canada; J. D. Johnson, president of Canada Cement Limited, and A. B. Purvis, president of Canadian Industries Limited.

Slum clearance is not included in the scheme which is directly concerned with the building of new houses. First item in the program is to establish co-ordinated working committees.

The working committees will seek out prospective homebuilders, submit their plans and take charge of the technical and administrative work. Financing will be done through the Housing Act.

The plan is based on three main foundations: Publicity to include educational work to encourage the building of homes; the technical side, including standards of construction, and the administrative side, co-ordinating the entire movement.

Largest Tree In World

Redwood Capable Of Supplying Lumber For 100 Cottages

Fifteen years of observation, correspondence and collection of data from forestry authorities all over the world convince T. J. Starker, professor of forestry at Oregon State College that he is qualified to name the biggest, oldest and tallest trees in the world.

Fantastic stories of great trees prompted Starker to start his strange quest. Many of the reports proved false, others greatly exaggerated, while many forest giants shrank in size under investigation.

Sequoia, eucalyptus, fir and cypress were the classification of trees receiving the most publicity as to size. The tallest tree in the world, according to this investigator, is a redwood on North Dyerfield Flat in Humboldt state park in Northern California. It is 364 feet high.

The largest living thing, in terms of wood volume, is the General Sherman tree, also in California, a big tree which contains 600,130 board feet, enough lumber to build more than 100 good, substantial, five-room cottages.

A Remarkable Pawn Shop

Just Closed In London After 125 Years' Business

Britain's most famous pawnshop, the old Nautical House, in Limehouse, has just been closed after 125 years' business. Seafarers of all nations knew this shop. It is said that in 1846, Charles Dickens sat there on a high stool for four days gathering material for an article on pawnshops. Many queer stories of London's Chinatown lie behind its closed shutters, on which in scarcely discernible lettering can still be read the announcement: "The Old Established House for Sextants, Ship Chronometers, Marine Glasses, Guns, Revolvers, and Mufflers."

Nevada now has an automobile for every 23 inhabitants. It marks a step in the state's importance. So often in car statistics he figures as 5.

"Women in Paris are now wearing coats of 'maison slim' says a fashion writer. So far that means are bananas. 2134

The SNAPSHOT GUILD CHARACTER STUDIES

With a selftimer on your camera, you can make "character" snapshots of yourself.

Did you ever stop to think that all of us have had a desire at some time to be a stage or screen star? Deny it or not, it is still true that we like to see ourselves in pictures—although it may be just a snapshot.

Way down deep in everybody's nature is that feeling that we have certain points of similarity to some noted actor or actress. Then too there are certain facial expressions that we have cultivated which seem always to amuse our friends.

Now if you want to convince your self of your ability—or failure—as a comedian or a tragedian you can do so quite effectively with your own camera. Put yourself in pictures. Few properties are needed for these personal, informal character snapshots. Special costumes are not always necessary, for in many instances it will be the facial expression that tells the story. In the two pictures shown here, however, the costume plays a rather important part. A burnt cork, sharpened to a point, will help accentuate the features of the character you wish to portray.

You may find it difficult to hold a certain expression for more than a few seconds so have your camera-man have his camera properly focused, and ready to shoot before you "go into character."

Suppose that you want to experiment with the idea by yourself. You can take your own picture. How? Use a self timer. A self timer is an inexpensive gadget that fits over the end of the button on the cable release of a folding camera. It is adjustable so that you can set it to give you as much as 30 seconds to take your position before your camera and comfort your face into character and then—zip—and you have your picture. Some camera shutters have a built-in self timer so if you have one of these models and haven't used this feature, now's your chance.

These snaps can be taken outdoors or indoors by well lighted windows or at night with two or three floodlight lamps. With floodlight lamps, however, it will be necessary to use a camera with an f.8.3 or faster lens. The shutter speed in this instance should be set at 1/25 second. Set the diaphragm at f.8.3. You will find this type of snapshotting a lot of fun and it will help you while away many hours during the cold winter days and nights when outdoor activities are none too pleasant.

JOHN VAN GUILDER

Offenders Receive Credit
Traffic rule offenders are to pay for a new set of warning signs on Louisville, Ky., streets, and a plate hanging on the sign will give the offender proper credit. Fines will pay for the signs and on each sign will be suspended something like this: "John Speedster paid for this sign. He was fined for running through a red light at this corner."

The chickadee is as much at home hanging upside down as it is in an upright position.

Repair Railway Equipment
An order-in-council, published in the Canada Gazette, authorizes a loan of \$1,200,000 to the Canadian National Railways for repairing equipment in their shops at Montreal, N.B., Riviere du Loup, Que., St. Malo, Que., Point St. Charles, Que., London, Ont., Stratford, Ont., Transcona, Man., Fort Rouge, Man., Edmonton and Port Mann, B.C.

One way to become a great artist is to paint some pictures and then stay dead two or three centuries.

CROCHET A THROW RUG FOR BEDROOM OR BATHROOM

"Water-lilies and cat-tails!" Doesn't their clean freshness make you want to sit right down and get to work on a brand new crocheted rug for your bathroom—or bedroom? If you've never made—or owned—a crocheted rug, this exclusive Alice Brooks pattern is sure to bring you Beginner's Luck. For it's easy as A.B.C. Materials? Your trusty crochet hook and some white and colored carding (that heavy cotton thread), rug wool, or useless rags. Whichever your choice, you'll have a rug that's sturdy, washable and a joy to behold! What's more this versatile pattern also includes a matching towel band design and one for a scarf to be crocheted in string. The Alice Brooks pattern includes a full set of instructions, and the stitches, and gives material requirements. Send 20 cents for pattern Y6289 to Household Arts Dept., Winnipeg Newspaper-Union, 116 McDermott Ave. E., Winnipeg. There is no Alice Brooks pattern book published.

Principles Of Good Farming Were Known And Practiced From Time Of Early Romans

How Royalty Makes Tea

King George Has Own Recipes For Cold Beverage

During a royal "shoot" at Sandringham, a member of the party pulled out a flask and took a drink. The King noticed the action and asked what beverage it was that gave him so much satisfaction. "Cold tea, sir," was the reply. The King smiled, saying: "But it is not made the right way, I am sure." "Oh, yes sir, I think it is," said the other, "poured off the leaves and allowed to get cold."

"That's not the way," said the King. "My way is the only really good way of making cold tea—it must be made with cold water."

Of course, there was a respectful outbreak of dissent, but the King stuck to his point and there and then told them how to make "royal tea," and here is the recipe:

Take the ordinary quantity of tea—a teaspoonful for each person and one for the pot—put it in a jug, and pour in as much cold water as you require. Then allow the mixture to stand for 12 hours, pour it off the tea leaves, and add milk and sugar according to taste—and the result is cold tea fit for a king.

It is this tea that the King always carries with him on shooting or fishing expeditions.

The King shares with most Englishmen the habit of taking the odd cup of tea at any time of the day or night. But the head of the House of Windsor goes further than the average Englishman inasmuch as he has facilities for making tea installed in his dressing room, ready for any emergencies or for wakeful hours.

Lightning Does Repeat

Experimenter Says It May Strike Same Spot 40 Times

A bit of information tending to "debunk" some of the oldest and most popular beliefs was contributed by Karl B. MacEachron, high voltage experimenter, during a visit to Denver, Colorado.

Lightning, he said, does strike more than once in the same place. In fact it sometimes hits the same spot as many as 40 times. It all happens so fast, though, that to man it appears as one stroke, he asserted in explaining the "multiple stroke."

MacEachron gave several scientific sound hints on how to avoid being struck by lightning bolts. He listed the following "don'ts" to remember during an electrical storm:

Don't stand under a tree.
Don't sit on the radiator in your home or office.
Don't sit in the bath tub.
Don't use the telephone if you live in the country because lightning arresting wires are not under ground as they are in most large cities.
Don't handle electrical appliances.
Don't stand in front of a fireplace.
Pressure may blow out the bricks.
Pressure, MacEachron explained, is responsible for much of the damage that accompanies a lightning stroke. When a tree is struck, he said, pressure is so great that something similar to an explosion occurs.

The Wettest Spot

Point On West Coast Of Vancouver Island Has More Rain Than Elsewhere On Continent

Henderson Lake, situated on the west coast of Vancouver Island, 90 miles northwest of Victoria, the wettest spot in North America, and possibly South America, too, was rather disappointing in 1935.

After starting the year with the enormous precipitation of 72 inches in June, the month of the most floods, the famous wet spot slackened off the same as other upland points during the unusually dry summer. It ended the year with a total precipitation of 560 inches, with a bang-up finish of 50 inches in December.

The amount of rain which fell at Henderson Lake in January, 1935, is almost as much as has fallen in Victoria in the last three years.

The 560-inch precipitation was a big drop from the 1924 total, which was 514 inches, is a few inches below the average of the lake over a period of several years.

The last suddenly came to a halt in the middle of the street.

"What's the matter?" called the man from the back seat.

"I thought the young lady said to 'stop,'" answered the driver.

"Well, she wasn't talking to you."

No direct descendants of George Washington are living.

Universities, other seats of learning, literary societies, poetry groups, and lovers of the classics the world over are this year celebrating the two thousandth anniversary of the birth of the great Roman poet, Horace—born 65 B.C., died 8 B.C.

With the possible exception of the period between 530 B.C. and 430 B.C., in the days of Greece, when 14 of the world's most illustrious persons lived, it is no doubt safe to say that no one hundred years in the world's history over produced such a galaxy of men of genius as did Rome during the time from 99 B.C. to the year 1 of our Christian era.

During this period, Horace was born and wrote his immortal Odes; again, curiously enough fourteen men of supreme genius, this time Romans, enriched the world with their great talents. Poets, prose writers, agriculturists, historians, law makers, orators, commanders, and statesmen. The action and writing of these men in this single century have profoundly affected the whole course of the world's history. Horace, Virgil, Varro, Ovid, Cicero, Julius Caesar, Seneca, Horatius, Livy, Rufus, Lucan, Sallust, and the Emperor Augustus.

Considering that the Republic and the Empire of Rome lasted for approximately one thousand years, it seems astonishing to find that so many of the great Romans should have lived during one single century. Most significant to mark also that this brilliant period immediately preceded our Christian era.

Great as may be the justification for scholars and lovers of literature to celebrate this amazing Roman century, during which Horace wrote, it would seem that there is a similar justification for farmers and institutions of agricultural science to celebrate as well, for included among the fourteen illustrious Romans cited were three who sang and wrote immortal verse and prose on agriculture.

Virgil, whose Georgics is considered to be the greatest poem on agriculture ever penned; Varro, who wrote the earliest scientific book on practical farming; and Ovid, who tells us of the plants, herbs, shrubs and trees of those days.

The Roman mind of that period was pre-eminently practical, and the people then loved and revered agriculture, which they considered, above all other occupations, to be the most honorable.

During the one hundred years in question, Rome extended her boundaries over many parts of the then known world, and, carried, with her conquering legions, law, order, good government and good agriculture, which virtues have persisted in those countries until to-day, two thousand years afterwards.

The education of the Roman boys and girls of the period was designed to fit them for farm life. Girls were taught to manage a home, to spin and to weave; boys to plow, sow, reap, and to manage the business affairs of the farm, and, as well, to know how to conduct the various offices of the state, including the very highest, for farmers, above all others, were chosen to fill these exalted positions.

The character of the young people was moulded so as to develop a respect for parental authority and for law and order. They were taught to be modest in speech, discreet in behaviour, and as well to be thrifty and self-reliant.

Virgil and Varro, and other Romans of the period, tell us of these things, and they set out simple principles of good farming which are as sound to-day as they were then. Of the value of the production of varieties of crops and of breeds of livestock which were suited to the district. Of the use of good, pure seed, and of good, well-bred sires. Of the virtues of good plowing and cultivation. Of the necessity of eliminating all weeds. Of detailed methods of conducting efficiently every operation of the farm. They also instruct us in the care of plants, animals, and the equipment of the farm, and in the proper consideration of the people employed. Of the profitable employment of every hour in the working day including rainy days, and of the elimination of idleness.

Above all, they great writers enjoin us to consider the pleasure of farming to be a reward commensurate with material gain.—Searle Grain Co. Bulletin.

Witness at Highgate Police Court: "When I first saw him he was out of sight and out of hearing, and the noise he made was simply terrific."

Now Science Explains Why So Many People Past 40

Feel That They're Slipping
Losing Their "Grip" on Things

Many people "round 40 think they're 'growing old.' They feel they're a bit 'weak.' Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all.

Try this. Soon you'll feel like another person. Take either the familiar liquid "PHILLIPS" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

ALSO IN TABLET FORM:
Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each box contains the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

PHILLIPS'
Milk of Magnesia

Bernt Balchen, trans-Atlantic flyer and Polar explorer, visited the United States to arrange a feeder service from Norway to North America with Pan-American Airways officials.

A 720-mile telephone line linking Jerusalem and Baghdad was opened with a conversation between the chief secretary of Palestine and the premier of Iraq.

All Alberta lawyers appointed as "king's counsel" will be charged \$100 for letters patent, instead of \$25 as in the past, Premier Aberhart announced.

Inspired by advance notices of the golden jubilee celebration in Vancouver from May 24 to September 7, Edmonton businessmen are planning to organize a special train for a visit.

Hon. Raymond Brugere, French minister to Canada, announced building operations would commence in Ottawa next spring on a new legation and minister's residence to cost \$308,000.

Vulcan, a town of less than 1,000 population in a wheat district of southern Alberta has no financial worries. At the end of the fiscal year, Dec. 31 last, it had a surplus of \$12,403 in the bank.

Five one-dollar bills from the Dionne quintuplets—first contribution to the Young Men's Christian Association campaign in Toronto were not to be used as mere money. The bills were auctioned to increase the fund.

Discovery of a reclamation method which is expected to greatly widen availability of helium gas for treatment of asthma was announced by Dr. Alvan L. Barch, of the Columbia University College of Physicians and Surgeons.

In Many Languages
More than 600,000,000 Bibles in as many as 980 languages have been published by the British and Foreign Bible Society since it was formed 132 years ago, according to Rev. J. B. M. Armour, of Toronto, general secretary of the Canadian society, who spoke at St. Andrew's Presbyterian church recently.

The United States contains 297 religious bodies, with a combined membership of 62,000,000.

Constipation Gone!
Suffered since twelve years old. Fruit-A-Tives brought lasting relief. Now enjoys life.

"Since twelve years old I was ill with constipation. Then three years ago I started Fruit-A-Tives. They are mild and gentle in action, and they gave me wonderful relief. I am now able to enjoy life once more." Mrs. F. Williamson, Montreal.

Containing extracts of APPLES, ORANGES, FIGS, PRUNES and PEARS. Fruit-A-Tives are natural—do not contain habit-forming drugs. They work to strengthen all organs of elimination. Their tonic effects help bring lasting, glowing health.

FRUIT-A-TIVES NATURE'S FRUIT AND HERB

Eye To See In Dark

Vacuum Tube Shows Scene As Sharp As Visible Light

Science has given man an eye to see in the dark—a foot-long vacuum tube on which the invisible infra-red and ultra-violet rays that fill the air form a visible, living, moving, continuous image.

The new tube was shown for the first time at a general meeting in St. Louis of the American Association for the Advancement of Science by its discoverers and inventors, Dr. V. K. Zworykin and Dr. George Morton of the Radio Corporation of America laboratories.

The scene revealed by the vision tube is greenish-black and white, without other colors. But it is as sharp and distinct as visible light.

Many practical applications appear to be immediately realizable. An airplane with such a telescope could guide itself into a secret landing field by an infra-red, or black light, beacon so dark as to be invisible to persons near it on the field.

Makes Good Story

Of all the stories of Dwight Morrow's absentmindedness this is one of the best. After talking to a friend along the sidewalk on lower Broadway for some time, Mr. Morrow, saying good-bye, inquired:—"By the way, when you met me was I going uptown or downtown?" The reply was downtown. "That's fine, then," beamed the banker. "I've had my lunch."

A plebiscite is a form of voting introduced in France under the Napoleonic regime by which the whole body of voters ratified or refused to ratify a legislative enactment.

Kindness Was Rewarded

Woman Receives \$1,000 Legacy For Befriending Stranger

A few minutes' hospitality and a little kindness shown by a Prince Edward Island woman to a stranger 36 years ago has been remembered by a bequest of \$1,000 specified in the will of the recipient of the kindness. The legacy was bequeathed to Mrs. Reuben Cate, a native of Summerside, by Miss Grace Fletcher Kelly, 80-year-old eccentric Boston reclusa, who died in that city recently.

In 1900, Miss Kelly was in East Concord attending the funeral of her sister, which was being held in a cemetery directly adjoining the lot on which stood Mrs. Cate's home. After the service Mrs. Cate noticed Miss Kelly standing, overcome with grief, beside the grave. Although she was a stranger, Mrs. Cate went to the graveyard and invited the Boston woman "to come in and rest and have a cup of tea."

Miss Kelly accepted the invitation, and said on leaving: "I'll never forget you for this."

A Boston barber attracts trade by serving tea to his customers.

SUNDAY SCHOOL LESSON

JESUS DECLARES HIS PURPOSE

Golden text:
The Spirit of the Lord is upon me, Because he anointed me to preach good tidings to the poor; He hath sent me to proclaim release to the captives, And recovering of sight to the blind, To set at liberty them that are bruised, To proclaim the acceptance year of the Lord. Luke 4:18, 19.

Explanations and Comments
Jesus Declares His Purpose, Luke 4:18-21. Jesus came to Nazareth, where he had been brought up and where he had lived through his early manhood until the age of thirty, and on the Sabbath entered the synagogue as his custom was. From the age of four he had been trained by his parents to attend the synagogue services, and now that he had come back inspired for his great work he continued to frequent the place of worship.

As requested by the presiding officer of the synagogue, or of his own accord as was frequently done, Jesus stood up to read the morning lesson. The attendant (verse 20) in whose charge were the rolls, handed him the roll of the prophet Isaiah, and he unrolled it at the sixty-first chapter and read the first two verses, adding thereto the clause from Isaiah 58:6, "to set at liberty them that are bruised." He purposely inserted these other words in the passage read, in accordance with a common custom. The rabbis said: "The reader of the 'shema' may skip from one text to another, but he may not skip from one prophet to another, but in the twelve (minor) it is lawful." This passage, in which the prophet declares to the exiles their approaching deliverance, is now read in Jewish synagogues on the Day of Atonement, and may so have been read at the time" (Dummelow).

The Inevitability of the People, Luke 4:22-24. All his hearers were astonished at the words of grace which Jesus spoke, but the effect of the words was neutralized by their long-time acquaintance with him, for they said, in a burst of talk as the discourse ended, "Is not this Joseph's Son?" And therefore not the Messiah, certainly not the Messiah, they meant. Seeing Jesus in the flesh prevented their seeing Christ in Jesus.

A One-Track Mind

Man With Single Purpose Does Not Accomplish Much

We have grown accustomed in these days to hearing "the man with one idea" lauded as a very practical person, the one who has but a single purpose and holds steadily to that, and so accomplishes the more. The truth is that this idea is usually of very little worth unless it is accompanied by two or three others to give it ballast and direction. In nearly every manufactory and every business that employs help, the great mass of the employees are those who are fully occupied with doing the one thing they are engaged to do; the day's work for the day's wage is their limit, and beyond that the place holds for them neither interest nor care. But there are the few, the few, or two, who are interested in the whole scheme—in what becomes of their work after it leaves their hands, how it fits in with the parts that others are doing, how the whole is managed, carried on, and the knowledge they gain enables them to do their own part better and to be ready for another part when it comes their way. They are not content with knowing only a fraction, they are intelligently eager to understand the whole, and it is these few.

The one-idea majority, who rise to positions of trust and power.

Likely To Be Wrong

Forecasting Weather Far In Advance Has Its Perils

The perils of weather forecasting for any long time in advance have been so often demonstrated that one must wonder at its being attempted so frequently. Many will recall the prediction that on December 17, 1919, the thermometer in Alberta would go to 100 degrees below zero. Winter had come unusually early and there had been an altogether abnormal stretch of severe cold. This so affected a large number of Albertans that they were prepared to believe the worst and very real fears were entertained that the date in question would see the prophecy realized. But it turned out to be about the mildest day of the winter.

—Edmonton Journal.

Evidently Forgot Himself

Recent Bride (to judge): "I can't stand it any longer. My husband actually swore at me. And I was learning to drive just to please him, too."

Judge: "What did he say?"
Bride: "He sat there in the ditch and said 'holy cats, woman! Didn't you see that truck?'"

No Such Thing As Gravity Claims Winnipeg Doctor

There is no such thing as magnetic or electric attraction and no pull of gravity, in the opinion of Dr. H. P. McPhail, Winnipeg physician.

He told the Royal Astronomical Society, Winnipeg Centre, these scientific facts were based on a speed of light of 186,000 miles per second, but, he claimed there was no normal or constant speed of light.

The essential difference between Dr. McPhail's theory and that of orthodox scientists was that he admitted no force except through motion, and no transference of energy except through direct contact.

In other words, the genial doctor said, there was no mysterious attraction or repulsion without an actual transference of motion through a medium of contact.

Thus, claimed Dr. McPhail as the learned members sat up in their seats, there was no pull of gravity and no pull of magnetic attraction. It was always a propulsive force of a rotating nature, he said.

This push of gravity is always due to infinitesimally small rays moving in every direction with tremendous energy, penetrating all matter and acting upon all particles within the mass.

"People with little knowledge of astronomy often make curious mistakes which are sometimes hard to refute," Dr. J. S. Plaskett, world-renowned scientist of Victoria, said.

"No scientist believes that there is no force without contact," Dr. Plaskett said. "The force of gravity is a known fact and the amount can be measured, but why the force of gravity exists, we do not know."

Dr. Plaskett laughingly declined to comment on the suggestion of a fellow scientist that a simple demonstration of Dr. McPhail's theory would be for the Winnipeg medico to step off an aeroplane 1,000 feet in the air and see if he could float.

Newspapers Are Best

Twenty per cent of existing business concerns do eighty per cent of the total volume of business because they are sold on advertising, says Louis L. Buich, of the Merchants Bureau of Dayton, Ohio, speaking at Montreal recently. He sees advertising in its most economical form in the newspapers because of their excellent coverage.

Of course, there are lots of good men. It's only a question of what they are good for.

STOP THAT COLD IN A HURRY WITH

Grove's BROMO QUININE

You can't be careless with colds. They can quickly develop into something more serious. At the first sign of a cold take Grove's Bromo Quinine. It's what it takes to stop that cold quickly and effectively. At all drug stores. Ask for Grove's. It's in a white box.

BOARD CONCLUDES INVESTIGATION OF AUTO TARIFFS

Ottawa.—A complete picture of the Canadian automobile industry, its claims for protection and arguments against protection is now before the tariff board as a result of the automobile hearing, which ended Jan. 16.

In final submissions to the board representatives of the western provinces contended the tariff on automobiles should be reduced or removed and argued manufacturers had advanced no arguments to justify protection.

The last word at the hearing was from Wallace R. Campbell, president of the Ford Motor Company, who said the automobile industry needed protection to the same extent as other secondary industries in Canada and submitted it was now too late for Canada to turn back on industrialization after large manufacturing industries had been established here.

Canada could have a healthy automobile industry without any duty protection, Dr. W. A. Carruthers, economic advisor to the British Columbia government, told the tariff board.

The automobile industry, Dr. Carruthers said, had never tried to get along without protection. It had developed out of the old carriage industry which enjoyed protection of 35 per cent, and naturally had taken advantage of all the protection it received down through the years. With the industry now well established, staffed with clever executives, and enjoying the natural advantage of being on the spot, he believed it could prosper without protection. It would mean adjustments and some people would lose jobs and have to find others, but it would help the country in the long run.

Canada's tariff structure placed British Columbia in an adverse trading position, he said. That province had to pay heavily for its automobiles made in Ontario and got no corresponding benefit from the industry.

British Columbia did not wish to destroy the industries of eastern Canada, but it wished the question of tariff protection to be viewed in a broad Canadian spirit, he thought, that inasmuch as tariffs bore heavily on the outlying provinces they should be reduced to and kept at the lowest possible level, and not at the level of absolute safety frequently demanded by manufacturers.

Wihart Robertson, representing Nova Scotia, New Brunswick and Prince Edward Island, said the maritime provinces desired keenly a reduction in the price of automobiles.

The whole tenor of the automobile companies' submissions, with few exceptions, said Mr. Robertson, ignored the real object of the inquiry, lower prices for automobiles in Canada. They made a plea for continued protection and continued higher prices.

Prices of cars in Canada were 30 to 50 per cent. higher than in the United States, said Mr. Robertson. Prices of parts showed an even greater spread and prices of used cars ranged as much as 100 per cent. higher than in the United States.

By regulating, drawbacks and arbitrary valuations the real protection afforded Canadian automobile manufacturers was much higher than the customs tariff of 20 per cent., he continued. This enabled Canadian manufacturers to sell cars at prices higher than the duty-paid price of imported United States cars.

"I suggest methods of raising the tariff and increasing protection without letting the public know about it is unsound," said Mr. Robertson, "an industry is built on an unsound basis when it is built on that basis."

Making Thorough Probe

Edmonton.—Witnesses will be subpoenaed and all evidence possible on the case will be demanded, Attorney-general Huggill said in answering pleas by a delegation of miners relating to the Coalhurst mine disaster investigation which will open at Lethbridge courthouse, Feb. 3.

Predicts Socialism in Britain

Toronto.—"Within four or five years there is strong likelihood a moderate form of Socialistic government will be in power in Great Britain," the Marquis of Lathian, noted British political authority, predicted in an address before the Canadian Club here.

Farmers' Lot Is Improved

Position Of Canadian Agriculture Better Than A Year Ago

Ottawa.—All factors considered, the position of Canadian agriculture is better now than a year ago and there is reason to hope one year from now the position will be further improved, according to the annual survey and outlook made public by the department of agriculture. This annual survey serves to a considerable extent as a guide to farmers in their spring planting.

After a comprehensive review of the wheat situation the review said: "While the wheat situation in so far as Canada's markets is involved at the moment, yet this country must and will continue to produce wheat on a substantial scale."

It should be noted, however, that in view of the greatly reduced world import demand the wheat produced by a normal yield on an acreage similar to that sown in 1935 would be difficult to dispose of.

"The quality of Canadian wheat has long enjoyed an enviable reputation on the world's markets and this must be maintained. In certain sections of the west, but chiefly in the so-called 'park belt,' the quality is liable to be below the average and in such sections it would seem desirable to adopt a system of farming that would involve a diversion of some of this wheat land to other crops. Fortunately, these sections are better adapted to coarse grains and livestock than are certain other areas that are restricted largely to wheat."

Bank Employees Shot

Two Members Of Bank Of Commerce Staff In Vancouver Shot In Holdup

Vancouver.—Police arrested three known underworld characters and held them for investigation in the holdup of the Powell street branch of the Bank of Commerce where two bank employees were shot, one probably fatally, by three bandits who escaped with \$1,200.

Meanwhile chief of police W. V. Foster announced the Canadian Bankers' Association had offered \$5,000 for information leading to the arrest of the gunmen involved in the holdup which may cost young William H. Hobbs, former Radisson, Sask., bank clerk, his life and sent Thomas Winby, bank manager, to hospital with a bullet wound in his left arm.

Winby also came from Saskatchewan where he was manager of several branches until transferred here in 1927.

Despite the three arrests officers continued to scour the city. The wounded men were rushed to hospital where it was found the bullet had pierced Hobbs' throat, striking his spine and paralyzing him. An emergency operation was performed and he was put under an oxygen tent.

Hobbs, 25 years old, was formerly with the Canadian Bank of Commerce at Radisson, Sask. He came to British Columbia in 1933. His parents were reported to be living in Edmonton.

Civil Service Examinations

Westerners Figure On First Fifteen Of English List

Ottawa.—The civil service commission announced that Aaron B. Handler of Kingston, Ont., headed the English list of 62 successful examination candidates for the eligible list of Grade 4 clerks in the government service.

The examination, open only to graduates of universities, was held to establish a list from which men for key positions might be drawn and trained to hold executive posts in the service.

The first 15 on the English list included: Edward A. Bence, Saskatoon; Russell H. Taber, Regina; Henry S. Ferns and Gordon H. Josie, Winnipeg; Solomon Milner, Regina, and Francis V. Kinahan, Calgary.

Must Pay Tax

Civil Servants In Manitoba Drawing Pay From Federal Government, Are Liable

Ottawa.—The supreme court of Canada decided that Canadian soldiers and Dominion civil servants drawing pay from the federal government and living in Manitoba were liable for payment of the two per cent. income tax imposed by the Manitoba legislature in 1933.

"The decision will affect more than 3,500 employees of the Dominion government and members of the permanent militia forces."

Storage Of Gas

First Attempt In Canada To Store Gas Underground

Calgary.—Successful storage of gas in a depleted field—the first known attempt in Canada to store gas underground—has been accomplished according to an announcement by P. D. Mellon, general superintendent and chief engineer of the Canadian Western Natural Gas, Light, Heat and Power Company.

The company has repressured the Bow Island gas field, Mr. Mellon said, and 8,000,000 cubic feet of gas had been stored in the field up to Dec. 31, 1935. Of 27 wells in the field, 18 were sealed and two others were reconditioned and made available for receiving and repressuring purposes.

Experiments were first carried out in the field, the engineer stated, and when these proved successful in raising the pressure by injecting 37,000,000 feet of gas into eight wells, raising the rock pressure 30 pounds per square inch, the Dominion government co-operated by issuing an order-in-council withdrawing the rights to, file or drill on approximately 20 square miles of territory.

OIL SANCTIONS PROPOSALS HELD IN ABEYANCE

London.—In a London thick with gloomy fog the cabinet met to discuss the next move regarding proposed oil sanctions against Italy. It was the first full cabinet meeting since the cabinet met to discuss foreign secretary.

Eden will attend the league council meeting at Geneva, it is expected, with a "waiting policy." The foreign secretary, it is predicted, will sound out the other delegations and after the usual Geneva conversations state the British position. That position, according to present indications, will be largely dependent on the situation as revealed at Geneva.

Factors entering into a more modified British attitude are: Reports that the league sanctions now in force against Italy are working better than anyone anticipated, thus rendering further action less urgent. Doubts whether oil sanctions are expedient at present in view of the existing Italian strikes, the opening of the "little rainy season" in Ethiopia, and uncertainty about the attitude of oil-producing nations outside the league.

On the other hand, the waves of protest which swept over Great Britain against the Hoare-Laval peace plan last month was a warning which no government, however strong, can afford to ignore.

As a shareholder in the Anglo-Persian Oil Company—which counts Italy among its customers—the British government feels particularly open to criticism. It may further be taken that if nothing is done on oil sanctions by the time the House of Commons re-assembles February 4, the opposition will launch a renewed attack.

"Big surprises" are in store for all Britons when the cabinet's national defence plans are announced, the Manchester Guardian said.

"Concern caused by German rearmament, while not recent, has been increased by the endless funds devoted by the reich to its armaments," the Guardian declared.

PRINCE BUYS A FANCY COSTUME

Here we see His Royal Highness the Prince of Wales leaving a famous London costumer's shop after being fitted with a fancy dress costume which he wore at a New Year's Ball in London.

EMPEROR'S ADVISER

Admiral Viscount Mako Saito, former Premier of Japan, who has been installed as keeper of the Privy Seal—a post which enables him to become one of the chief advisers of Emperor Hirohito. Saito is a strong opponent of army dictatorship.

Army Budget Doubled

Soviet Will Spend Large Sum To Strengthen Forces

Moscow.—After repeated charges against the Soviet Union with war both to the east and west, the government announced its military budget for 1936 will be more than double that of last year.

During 1935 the standing army was brought to approximately 1,300,000 men.

Russia this year will spend 14,800,000,000 rubles (\$2,960,000,000 under the new official exchange rate) on armed forces, Gregory Glinko, commissar of finance, announced to the all-Union central executive committee. The committee unanimously approved the proposal.

Last year's war budget was 6,500,000,000 rubles, but the expenditures actually reached more than 8,500,000,000 rubles.

Glinko also announced 28,700,000,000 rubles will be used this year for construction work, a large part of which will go to the reconstruction of Moscow and Leningrad.

Heckler Asks Question

Malcolm MacDonald Is Queried Regarding Canadian Oats

Dingwall, Scotland.—Canadian oats entered the picturesque by-election battle in the constituency of Ross and Cromarty.

"Could you not, as dominions secretary, have already stopped excessive importation of Canadian oats?" a heckler questioned Malcolm MacDonald at a meeting of farmers in Dingwall cattle market.

"I have been dominions secretary only a few weeks," MacDonald replied. "It depends on you whether I am going to remain dominions secretary for more than another few weeks," he continued amid laughter.

His policy was the home produce first and the dominions second, MacDonald said.

Sale Of Match Company

Hull, Que.—Sale of the Canada Match Company to the Eddy Match corporation for \$250,000 was reported here. The Canadian Match Company has been manufacturing in Hull for about six years. Employees number 100. Manufacture of matches in Hull would be continued, it was understood.

Visits Mining Area

Lord Tweedsmuir Interested In Technical Process Of Mineral Extraction

Kirkland Lake, Ont.—After visiting the Noranda mine, interesting himself in the technical processes of mineral extraction, the governor-general came to Kirkland Lake during his first visit to northern Ontario.

Much of what Lord Tweedsmuir saw at Noranda was new to him, but some was not. As he was guided through the extensive workings by President J. Y. Murdoch and General Manager H. L. Roscoe, of the mine, His Excellency was informed one particular machine was something of an innovation in gold mining.

Lord Tweedsmuir demurred. He had seen the operation once in the Rand, 30 years ago, and to his hearers he gave the place, the date and the name of the man in South Africa who had worked the machine.

May Protect Indians

Old Treaty Covering Hunting Produced In Ontario Court

Wallaceburg, Ont.—A clause of what is believed to be the Jay treaty effected by Governor Simcoe in 1792 and stating that Indians may hunt within 10 feet of the banks of any creek in Canada, was produced in court here by R. A. Caracallen, lawyer defending two Indians on an illegal hunting charge. The result was that Magistrate S. B. Arnold reserved judgment in the case for a month while he investigates the authority of the Jay treaty in relation to present day conditions.

NAVAL PARLEY IS NOW CLOUDED IN UNCERTAINTY

London.—Japan walked out of the international naval conference and the future of limitation of naval armaments—an established fact for 15 years—was clouded in uncertainty.

All delegations, including the Japanese, made clear they wanted to avoid a naval building race. Nevertheless, in some quarters, this was seen as an eventual possibility resulting from the breakdown of the five-power conversations.

Japan's move was because the four other powers—and with them the British dominions represented at the conference—failed to grant her demands for naval parity with Great Britain and the United States.

Abandonment of the parley by the Japanese was quickly followed by a veritable rain of statements and explanations from all delegations designed to show why the meeting broke up.

Britain, the United States, France and Italy voted to continue in an attempt to work out a limitation agreement without Japan.

Lingering hopes, were expressed in British and American quarters that the Japanese might return to the conference and that the development would not harm relationship between them on other questions.

Admiral Oami Nagano, head of the eastern delegation, said in a statement Japan does not want to enter a naval race and was determined to cultivate assiduously the most friendly relations with other nations. There were no indications that this reassured the other delegates, however.

The British labelled Tokyo's proposal "suicidal" to the British Empire in the present state of the world.

The British position, it was said in authoritative quarters, was that while she has responsibilities in European waters, the Atlantic, Indian and Pacific oceans, she was asked to uphold all those responsibilities with a fleet no larger than that of a country concerned with one, or at the most two, of these seas.

Hinting at uncertainties developed from the Italo-Ethiopian war, it was said that it is plain to-day that the British navy is as necessary to "uphold collective security" as to defend its own country.

After the meeting an American spokesman said: "We will join a four-power conference because we do not want a naval race."

"Naturally we will have to consider a provision for some contingency in case Japan or some other power starts building."

"There will probably be some escape clause in any agreement the four powers may reach so as to take care of any such contingency."

GRANTS THIRTY DAY REPRIEVE TO HAUPTMANN

Trenton, N.J.—Bruno Richard Hauptmann, convicted Lindbergh baby killer, was saved temporarily from the electric chair by a 30-day reprieve from Governor Hoffman.

It came only 29 hours before the hour of execution.

"I am granting a reprieve," the governor said, "for divers reasons which I do not care to disclose at this time."

The reprieve, though only for 30 days, actually assures Hauptmann of at least eight more weeks of life and perhaps three months due to the fact it will be necessary to present him.

Governor Hoffman acted soon after the United States supreme court, in a one-sentence decision by Chief Justice Hughes, had denied Hauptmann's appeal for a writ of habeas corpus and a stay of execution.

There will be only the one reprieve, "unless the evidence should warrant" another, the governor said. If Hauptmann is finally to be saved it must be through the presentation of sufficient new evidence to warrant Justice Thomas Trenchard, who sat at Flemington, granting a request for a new trial or for a new plea for clemency to the state pardons court.

The governor announced his decision in his office shortly after talking with Mrs. Anna Hauptmann, who presumably had called upon him to plead for her husband's life.

"There was no formal statement by the governor, who spoke extemporaneously. He said:

"The attorney-general and I have been in conference on this matter, and I have decided to announce a reprieve of 30 days."

"We have agreed that this will not be challenged."

"It is my intention to grant only this one reprieve. There will be no further reprieve."

"I am giving this reprieve for divers reasons which I do not care to disclose at this time. It is an act of executive clemency, and there can be no extension of the reprieve unless the evidence should warrant it."

"No formal request was made to me to take this action."

"There is plenty of precedent for the action I am taking."

Ontario Town Wrecked

Natural Gas Supposed To Be Cause Of Explosion

Wheatley, Ont.—Natural gas, escaping from a heater, is believed to have caused the terrific explosion which shook this town, demolished the Oddfellows' block and caused damage estimated at \$50,000. Two women returning from a party were knocked down by the blast and struck by the flying debris but were not injured seriously.

Only a single wall remains of the building, considered Wheatley's finest. The post office village council chambers, Gillies funeral parlors, and lodge quarters were obliterated, while mail and town records went up in smoke as fire ensued following the explosion.

Those villagers who were first on the scene said they saw four balls of smoke and flame burst through the roof of the building, and then the entire structure crumbled into a heap.

Alaskan Cities Quarantined

Mild Cases Of Scarlet Fever In Many Places

Anchorage, Alaska.—Anchorage joined the list of "quarantined cities" as scarlet fever cases numbered seven, all mild. The schools were closed and public gatherings banned. Fairbanks and Palmer also have been quarantined for scarlet fever and smallpox.

Seward, Alaska.—Dr. A. D. Haverstock of the public health service, asked the coast guard cutter Morris to be despatched from Cordova to Port Graham, where 15 persons were reported ill of an undetermined nature.

Port Graham is a fishing village on Cook inlet, near the tip of the Kenai peninsula.

Will Conduct Survey

Halifax.—A reliable source said William Duff, Liberal member of parliament for Antigonish-Guysboro, would leave soon for New York and Washington to conduct a survey of reactions to the Canada-United States trade agreement.

Discover Origin Of Cellulose

Announcement By Women Scientists May Change Chemical Industry

Two women scientists announced solution of a major mystery of science, the origin of cellulose, in a report of the American Association for the Advancement of Science.

Cellulose is the product of all trees and plants, used to make synthetic silk, paper and the thousands of household articles which cause chemists to call this the "cellulose age".

No one previously has ever been able to see how plants make their cellulose. The discovery is a first step toward a possibility of manufacturing cellulose partly by machine, without aid of plants, a change which would make available limitless supplies of paper and clothing and mean another chemical revolution.

The microscopes of Mrs. Wanda K. Farr, associate cotton technologist of the U. S. department of agriculture, and Dr. Sophie H. Eckerson spied out the origins of cellulose. Both work at the Boyce Thompson Institute for plant research at Yonkers, N. Y.

While examining fibres of cotton, 90 per cent. pure cellulose, they saw nature's cellulose-making process in action in the cytoplasm of cotton cells.

Cytoplasm is a clear substance like the white of egg surrounding the nucleus of cotton cells, just as the white around the yolk in eggs. All living cells—man, plant or animal—have this same structure and similar cytoplasm.

The cells are visible only under powerful microscopes. Drifting in the cytoplasm of the cotton cells, the two women saw minute particles shaped like sausage balloons.

They drifted toward the outside of each other end to end, or sometimes side to side. Closer examination showed each balloon coated with a sticky substance, pectin.

The head-like chains and sheet-like masses of balloons floated to the outside surface of the cytoplasm and made a wall there, a wall that by chemical analysis bears every test of being pure, newly formed cellulose.

The women broke down the balloon chains, subjected the balloons to various chemical tests and every one brought added evidence that each particle was cellulose.

Women Good Air Travellers

Relax Quickly And Are Less Restless Than Men

Women apparently make better air travellers than men.

This information showed up in a study of the needs and attitudes of air passengers made by the airline in establishing a "ground school" where its 75 stewardesses are taught applied psychology, some home economics and aviation rudiments.

Some of the things the company learned about its clients, and Newton Wilson, instructor, and Stewardesses Grace Hall of Milwaukee, Wis., who has flown nearly 50,000 miles, and Ruth Phelan, of Iowa City, Ia., with 400,000 miles in the air, were:

Women flying the first time relax quicker than men; first fliers; women take had weather calmer than men; women generally obey instructions better; women are more careful where they put their cigarette ashes; men demand more service and attention than women; men ask more questions; men get restless quicker than women and male epicures are more fussy about the menu than women on a diet.

Women, if air sick (company's latest records showed only 90 passengers out of 21,000 get airsick) take it less seriously than men—and they take something to settle their tummies even if it does "taste awful" with less squirming than men.

A Family Of Masons

Australian News Letter says what is probably an event unique in Freemasonry in the British Empire took place at a meeting of the Dynamic Lodge in the Brisbane Masonic Temple, when Wor. Bro. James A. Boden, P.G.D., as acting master of the Lodge, initiated his seventh son into the craft in the presence of six other sons.

Started Farm Contests

One hundred years ago King George the Fourth, of his own accord started a movement aimed at "encouraging honest and industrious laborers" as a result of which ploughing matches and sheep-shearing contests were shortly afterwards instituted.

The foreleg of a horse from knee to hoof corresponds with the middle finger of a man's hand.

Brush your loaf of bread with melted shortening before baking to get a fine even brown crust.

MANSSION OCCUPIED BY THE LINDBERGHs IN WALEs

Lindbergh home in Wales

An historic mansion at Cardiff, Wales, top, formerly the home of Aubrey Morgan, brother-in-law of Anne Lindbergh, is the present home of Colonel and Mrs. Charles Lindbergh and their son, Jon, who are shown below as they entered their automobile for a drive through the countryside, adopted as their home when they left the United States because of kidnap threats against Jon.

Monarchy A Mighty Symbol

Britain's King Has Power To Move People For Good

The King is a symbol to Britons, a puzzling symbol to outsiders, but as a symbol he has power above politicians, or statesmen, or armies to move the people for good. The symbol of the monarchy is a mighty one to British subjects. The King is an embodiment of the mind, at once tangible and intangible, the visible embodiment of British pride, British tradition and British sovereignty. For this symbol of our King is the centre, the heart-pull of respect for constituted authority. That is a possession to be valued beyond any other in the restless world today.

For, if there were a crisis in British history and politicians or parties were in strife that could not be solved, the King would be the final court of appeal. In any more grave issue the monarch would be the final arbiter or referee. Of course, that crisis has not happened for centuries and it is not likely the King would ever be placed in a position where he would be liable to incur strife. Indeed most Britons would not regard it as "cricket" to involve the monarch in political controversy.—Brandon Sun.

Authorship Not Known

Music Of Famous Christmas Hymn Ascribed To Several Composers

More than seasonal interest attached to the controversy that has arisen in England over the authorship of "Hark, the Herald Angels Sing." The generally accepted theory was that the famous Christmas hymn was adapted by Dr. W. H. Cummings from a melody used by Mendelssohn, but this is being disputed. The Mendelssohn "Festgesang" was heard first in 1840, at Leipzig, in celebration of the 400th anniversary of the invention of printing by Gutenberg. Now the composition has been ascribed to both Handel and Mozart, along with several lesser musical lights, while still another group contends that the air is "traditional." Charles Wesley wrote the words.—Brandon Sun.

Rubber Road Wears Well

Experimental stretches of rubber highway laid in Kuala Lumpur, Malaya, have worn well for many months, according to a report from Singapore, in the heart of rubber plantations. Here and there, it is stated, it is necessary to refix the edges with bitumen.

Cattle Travel On Raft

For years the cows brought by farmers from the Isle of Man to the Calf of Man, a small island off the south coast, have swum across the sound. Animal lovers have protested that it is hardly fair to the cows to make them swim, so they are now to travel in comfort on a raft.

Child born in London the other day has been christened Oliver Twist Pickwick. It must look like the Dickens.

There are about 160,000 uses for wire.

Has Only Three Pupils

School Built Especially For Children Of Scotch Shepherd

In a lonely glen in Sutherlandshire, Scotland, the smallest school in the British Empire is thriving. It was built last May to comply with an Act of Parliament which rules that no child may walk more than three miles to school. Three children of James McKay, a shepherd, are the sole pupils. Every morning they finish their breakfast in the shepherd's hut on the moors, and set out on their three-mile trudge to school. Strict hours are kept at the school, and the children are seldom late. A teacher cycles three miles every day from her home to instruct.

Leaves often are found to contain starch, especially at the end of a long period of bright illumination. They seldom contain starch in the morning or on cloudy days.

Most botanists recognize about 100 species of roses. The number of horticultural varieties, crosses and hybrids, however, is very large, more than 3,000 varieties being listed.

Another Wonder Clock

Plays Pipe Organ, Talks, Sings, And Tells Time

What is claimed to be the world's most wonderful clock has been made by a seventy-year-old man, Mr. Martin Shearer, of Akron, Ohio. This clock which took ten years to build, is designed to be as companionable as a machine can be. It plays a reedless pipe organ, and can be made to recite, talk and sing. It contains 5,000 pieces of wood, several miles of electric wire and is valued at \$50,000. The clock also indicates the time according to 27 of the principal cities of the world.

Penalty For Destroying Pasture

In certain districts of England a clause is often inserted in farm agreements making a tenant liable for large sums of money for every acre of permanent pasture which he ploughs up. This applies particularly to the Wild White pastures of Kent, the prime pastures of Leicestershire and also heavy, undrained land.

Hour glasses and sundials were invented by the ancient Egyptians.

MORGAN QUIZ STIRS WAR ECHOES

President Wilson's neutrality policy during the World War and the part of the spectacular Senate munitions committee hearing. Above are some of the principal witnesses. Left to right, top: John Pierpont Morgan and Russell Leffingwell; below, George Whitney and Thomas W. Lamont, all members of the House of Morgan. Morgan and his associates were firm in their denial of the intimation made by Senator Nye, committee chairman, that the Morgan financial operations helped to break down the neutrality policy of President Wilson and precipitated the United States' entry into the war.

Farmer Follows The Sun

Plants Crops In Several Climates And Harvests Year Round

The following story is from Time: "West from Hardin, Mont., one day in a recent week rolled a remarkable caravan bound on an extraordinary journey. Thundering in line went three huge trucks with trailers, a fleet of small trucks and passenger automobiles. The trucks carried six \$6,000 tractors, four giant plows, four seeding outfits, a mass of trip hammers, lathes, forges, tools. They were bound through snowy valleys and over icy mountains for California's warm rich San Joaquin Valley, and the newest venture of Tom Campbell, world's No. 1 Big Farmer.

"A chapter of U. S. history is the story of how, during the war, Tom Campbell got \$2,000,000 from J. P. Morgan and some other bankers and the government's permission to choose his land from 10,000,000 Indian Reservation acres, brought mass production to agriculture on the biggest wheat farm in the world (Time, January 9, 1928).

"Drought and depression cost Farmer Campbell \$600,000 from 1929 to 1934, cut his wheat plantings to 20,000 acres. Through long Montana winters he saw his expensive machinery and skilled workmen standing idle. Why not, he asked himself, scatter crops in other climates, harvest the year round by sending machines and men after the sun?

Matching his equipment, experience and government credit rating with outside money, Tom Campbell leased 14,000 fertile, irrigated acres in San Joaquin Valley. When his caravan arrived he began planting 3,000 acres to flax, to harvest in May and will then send his machines back with the sun to Montana.

An Old Almanac

Purpose Was To Designate Lucky And Unlucky Days

An almanac which, records show, is more than 5,000 years old, recently was found in one of the buried tombs of Egypt. The owner must have valued it, since he had it buried with him. It is written on papyrus, in columns, and there are 25 pages well preserved. Its chief purpose was to inform its owner whether each day was lucky or unlucky for any sort of enterprise. Certainly it was not so important to know that a certain day was the fifth of Tobi, with a new moon and a prospect of rain, as to know that was a day when you must not start on a journey, look at a rat, wash yourself with water, or even go outdoors before daylight. It was issued for the four years following the 57th year of Ramses the Great. Each day was written in red ink, and each one is followed by three characters—morning, day, evening, each with its significant mark to denote prosperous, indifferent, adverse. The first sign is in black ink, and the others are in red. For examples, the 25th of Thoth is marked "Good, good, middling," with the caution, "Do not go outdoors in the evening."

Women Easily Satisfied

Less Fussy On Trains Than Men Opinion Of Official

Miss Avis Lobdell, who started the first railroad passenger coaches for women only, thinks women travelers are "less fussy" than men.

She holds the highest railroad position of any woman in the United States, having recently been appointed special representative of the executive vice-president of the Union Pacific, W. M. Jeffers.

"Women are slyer" than men about asking for services available on a train," Miss Lobdell said recently, "and they are less fussy in demanding things, or about what they get. They carry a great deal more baggage of course."

"They do not mix or get acquainted with other passengers as readily as the men, except on the coaches for women only. They seem to drop reserve and make friends of fellow-women travelers quickly."

Number Was Lower

Only 18 centenarians died in 1935 as compared with 28 in 1934. Ontario leads last year with seven. Quebec and Nova Scotia have four each, British Columbia two, and Manitoba, one. Eleven out of the eighteen were women.

In the old Gwangengon prison of The Hague, Netherlands, prisoners condemned to starvation were tantalized by food aromas conducted from the kitchen into the "hunger chamber" through air passages.

Not all insects destroy plants. Some prey on the harmful species.

A way you can save on gasoline is to sit in a rocking chair at home.

Rubber From Goldenrod

Dream Of Edison Likely To Be Realized Soon

Rubber in small quantities has been found in goldenrod, but to date it was scarcely worth while extracting it as the quantity was small. Now, however, it is understood that the Edison Botanical Research Corporation Laboratory at Fort Myers, Florida, has discovered a method for increasing the percentage of rubber that may be obtained. Harry Ukkelberg, head botanist, who works at the desk formerly used by Thomas A. Edison, said there has been a discovery which may climax the years of experimentation and bring to realization the dreams of the late inventor.

Goldenrod plants developed in seed-beds at the laboratory last 12 per cent. rubber, others said. Another 8 to 10 per cent. is resin. If the resin could be processed into rubber the experiments would be a commercial success. Acquaintances believe this is the discovery Ukkelberg has made.

Edison's hope was to produce domestic rubber at least as an emergency source if foreign supplies were cut off. Henry Ford and Harvey Firestone, who encouraged Edison in his first rubber producing experiments, make it possible for the laboratory to carry on. Edison selected goldenrod as the plant most likely to produce domestic rubber in commercial quantities, after experiment had been conducted with more than 500,000 plants. He crossed the common goldenrod with a giant variety he found growing fourteen feet high in the Florida Everglades.

Language Is Changing

Different Calls Are Used Now To Summon Cows

The rather startling information that even a cow can be certain about things in this day and age was made available by the learned members of the Linguistic Society of America, in annual confab at New York.

Dr. Hans Kurath of Brown University said most New England agriculturists summoned their cows with "co boss," or "come boss," accenting the first syllable. But in eastern New England, "kub boss" with the second syllable accented was not an uncommon cry.

Cows along the South Atlantic coast answered pretty promptly to "so wench," Dr. Kurath enlarged, while in the Blue Ridge sections the herds came trotting home to "rook" or even "wookee." Then again, up around Cape Cod "coaf coaf" was the coaxing call of most herdsman.

The various calls were demonstrated with enthusiasm by several delegates, who were in pretty fair voice until complaints from startled guests flooded the desk of the convention hall. The reading of poetry in Ban-erit.

Geologists Are Puzzled

Field Of Clay In Wales Seems To Recreate Itself

A field of clay that has puzzled geologists sustaining the oldest industry in Glamorgan, Wales.

The ground, which is about 90 yards square, is situated near the picturesque—named village of Ewenny. Since 1616 it has been dug over again and again and the clay carried to feed the kilns of the local potteries.

Hundreds of thousands of tons have been removed, but the field is about its original level.

The potter cannot explain the phenomenon except by saying: "The clay seems to re-create itself, or it may be that there is an enormous bed of it which constantly wells up as the top surface is dug away."

The potteries are a family concern, having been worked and passed in direct ownership from one Jenkins to another for more than 120 years. Beanie kilns built 300 years ago are still in use.

Woman Captain Of Freighter

Especially Efficient In Handling Crew Of Soviet Ship

A Tschistina, the first woman to become captain of a Soviet freighter, is a lover of music. During her sojourn in Odessa, the Black Sea port, she never misses a performance of the symphony orchestra. She is 27 and has spent 10 years at sea. She is preparing for a long voyage to Kamchatka. She never fears a heavy storm, and was calm throughout when trapped for six days in a deep fog between Elba and Gibraltar. She is especially efficient in handling a crew.

Water clocks were introduced into ancient Athens and Rome to time speakers in court of law.

The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches, or the pains of rheumatism, neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin".

We say this because, before the discovery of "Aspirin", most so-called "pain" remedies were advised against by physicians as being bad for the stomach, or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical "dings" about its safety were correct.

Remember this: "Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and all common pains, and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

FLEMING'S FOLLY
BY LAWRENCE A. KEATING

SYNOPSIS

Here is an absorbing and exciting story of a fight against stubborn prejudice and a bitter personal malice—of a girl and a man battling ridicule, sabotage, bullets, and the treachery that would turn them against each other.

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

Roper Kilgo, the boss of the Rawhide and nearby ranges, who seemed to approve the plan, but was really opposed to it, had forced Sock Torney, a derelict mining engineer, whom Kilgo knew would be called upon to give his expert opinion in favor of the scheme, to reverse his earlier endorsement, and declare that irrigation in Boone county so far as Hamilton's plan was concerned, was only a wasteful way to waste money.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Roper, who accuses Fleming of trying to influence his sister and, as he asserts, ruin his "spread". Buzz shouts at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is unharmed. Roper is arrested. The doctor attends Townsend and dresses his wound. Kilgo Roper suggests taking Helen to her home, but she refuses and Fleming escorts her home instead. This infuriates Roper to declare open hostility to Fleming. Helen and Fleming form a partnership to provide irrigation for their own properties. Link goes home, and is surprised to find Roper has died of him. Kilgo tries to induce Link to drop his scheme, and when Fleming refuses, gives a signal by taking off his hat, and Link is shot at from outside the house.

ALL the Benefits of Cod Liver Oil WITHOUT the Taste

The strength giving Vitamins A and D together with the bone and body-building Hypophosphates of Lime and Soda are happily combined in Scott's Emulsion, the easily digested Cod Liver Oil.

Link kicks Kilgo out of the house. Buzz Hamilton is sentenced to three years' imprisonment for shooting Roper.

(Now Go On With The Story)

CHAPTER V.—Continued

Both men froze at the ringing command from Sheriff Ames Stephen. "We had enough gun-talk 'tother day," Link grumbled. "That's the matter here, can't you men get along?"

"He called me a liar," Roper growled.

"He did distort the truth a bit, according to my views. Helen," Link went on directly, "are you heading out to the ranch?"

"Why—uh, I'd sort of planned going that way, Helen," Kilgo interposed, rubbing his jaw.

She hesitated while the three men watched her. "Why yes, but there's something important I want to talk to Link about."

His face lighted slowly with a knowing grin. "Shore, I savvy! I'll come over tonight and have a good talk. Remember what I told yuh, Helen—"

"About trying to buy me out so as to protect her from my bad influence?" Link grinned. "That's stretching the truth too, Roper. There was a queer shooting scrape at my place that night—"

"Shootin'?" Helen exclaimed.

"Nobody told me about it!" Ames Stephen growled.

"Probly some guy ridin' home drunk. Nobody got hurt."

Fleming turned to him and bowed.

"Thanks to poor marksmanship. Better get someone else next time, Roper."

He bristled again. "Are you tryin' to make out I put some guy up to that?"

Helen darted between the men, both of them rising to hot anger again. "Stop! Why, Link, whatever possessed you? I've known Roper for years and I know he wouldn't have anything to do with an attempted murder. That is too much, although of him, it's foolish to call a man a killer when you haven't the slightest proof. I—why, Link, I'm surprised at you!"

He stepped back in dismay. The suddenness of her defense of Kilgo brought a look of perplexity to the rancher's rather handsome face. Fleming avoided her accusing eyes. Seemingly he had overstepped himself. The heightening sense of trouble brewing between Roper as his chief antagonist had, perhaps, caused him to be indiscreet.

"Aw, Link, let's forget it. Come on, what do yuh say?" The other shuffled forward wearing a forced smile of friendliness. One hand was thrust out in the pretense of forgiving. Link eyed him an instant. Then his lids lowered and his voice sounded cold and controlled.

"That's just a grandstand play, and you know it. There's no friendship between us!"

He turned on his heel and started off. But with a gasp Helen scurried after and seized his sleeve. "Link, please! Why not be friends? If you won't," she hinted with color draining from her cheeks, "I—Roper, you will have made a choice. Roper is a good friend of Buzz, and he has known Buzz and me longer than—I have. I mean, well—"

Link hesitated, unwilling to pretend comradeship for one whose face and words were a mere mask of his true feelings. But Helen's meaning was clear: she was insistent upon this handshake to restore peace. Perhaps she felt it her duty to bring them together on a new basis. Roper considered himself practically engaged to her. What was her real feeling about that?

A partnership in irrigation could not be successful unless there was harmony between them. And—Link's pulse sped faster—wasn't that color concern in the girl's eyes, the concern for his well-being if he had an influential enemy in Kilgo?

He despised himself for doing it, yet felt he must. Sheriff Stephen watched the tableau in silence. Fleming raised his hand, pressed Roper's briefly, then turned away.

"Shall we start now?" he asked in a low tone.

As they rode off Link had an uncomfortable suspicion that somehow Kilgo had bested him in the scene. He cast a sidelong glance at Helen and found her uncommunicative. When they reached Rawhide and were walking their horses down its main street Otto Pieper emerged from his bank. He sighted the girl and beckoned.

"I'm sorry, but I forgot I'll have to stop and talk to Mr. Pieper. You see, I want to find out just what the condition of the Triple H is, how much money we have and all that."

He considered offering to wait, but felt instinctively that she might pre-

fer to go on alone—or to have Roper, who rode with several other men a half mile behind, escort her home.

"By the way," Link said, drawing his buckskin near as she dismounted before the bank. "I don't want to press you about this irrigation business, but I'm wonderin' if you really want to come in with me. Maybe you'd like to think it over real careful, now kil—er, folks are so set against it."

She tied her pony, then smiled at him from the sidewalk. "I've decided to go into it. And I never back out of a thing, Link."

His heart leaped. It was true that Triple H land adjoining his Star Loop spread would benefit the most, was the local outfit to club with him for the erection of a dam to back up Silver Creek.

"When can we get down to bed rock on this proposition?" he asked. "The thing should be started now so we'd get an alfalfa crop early next summer. If we wait till spring it'll be that much longer for a return."

She hesitated, then spoke what was on her mind. "Link, I didn't want you to have more trouble with Roper—that's why I asked you to shake hands with him. I came with you now to say that. Perhaps you don't like him, but after all, he is a friend of mine."

He flushed and made no reply. "But I'll tell him not to come to the ranch to-night. You come, Link, and we'll talk over all our plans for irrigation. Why not come early, for supper?"

The Box 50 owner, Benson, and Sheriff Stephen were dismounting a few yards away. Fleming felt certain Kilgo had heard Helen's invitation. He could not restrain a thrill of triumph. "Fine, I'll sure be there!" Turning his mount, he started at a brisk run for the Star Loop.

Pieper, he knew, would attempt to talk her out of participating in what the conservative banker now regarded as a "wildcat" scheme. Otto's habit was to believe what the majority of local citizens believed; he had discovered long ago that such a policy kept him in the good graces of influential men who might otherwise have ousted him from the bank presidency. Link hoped that Helen would not state her intention to Otto. As for Kilgo, he felt certain she could not not persuade her out of the partnership.

(To Be Continued)

Smallest Coin In Panama

Medio Worth Two And Half Cents Used By Poor

Down in Panama the smallest coin known as a "medio", worth about 2½ cents, there being no 1-cent pieces. The coin is used extensively by the poorer classes of the population. All goods capable of being reduced in lot to such value are quoted in this unit. This is particularly the case with biscuits of the cheap sweet variety which are very much in favor with the native population. The United States supplies the greater portion of this grade, while Great Britain caters to the demand for fancy or more expensive types of biscuits. Canada enjoys a comparatively small share of the trade along with Germany, according to the Industrial Department of the Canadian National Railways. There is somewhat limited domestic production of cheap biscuits by individual bakers, more or less as a sideline. There is a steady and considerable consumption of such biscuits largely among the native population.

Gun Encrusted With Jewels

Beautiful Piece Of Work Being Returned To Ceylon

One of the most beautiful pieces of early Cingalese craftsmanship in existence will shortly be returned to Ceylon from London. It is a handgun four feet long and encrusted with finely chased gold and precious stones. In 1815 it was in the armoury of Sir Wilfrid Mordaunt, the deposed King of Ceylon, and was brought to England by Sir John O'Day. It has now been purchased for Ceylon by Dr. Paul Pieris, the Ceylon Trade Commissioner in England.

Elm For Chinese Junk

Elm trees grown in the district of Elmira, Ont., will soon be part of Chinese junk sailing rivers in the Orient. Crews of men are busy hauling elm trees into square timber for shipment to Vancouver and thence to Hong Kong, China, to be used in shipbuilding.

Fewer Saxophones Sold

The meaning of the saxophone is decreasing in popularity. Manufacturers of Elkhart, Indiana, musical instrument manufacturing center. They report an increased demand for clarinets and trumpets.

Mr. CAFFEINE-NERVES finds out who is boss

MANY PEOPLE, of course, can safely drink tea and coffee. But there are thousands and thousands of others who cannot. And, without realizing it, you may be one of these.

The caffeine found in both tea and coffee may be working night and day to rob you of sleep, upset your digestion, or undermine your nervous system. If you suspect that tea and coffee disagree with you... switch to POSTUM for 30 days. Postum is simply whole wheat and bran, roasted and slightly sweetened. It is a delicious drink—and contains nothing that can possibly harm you. It is economical and easy to prepare.

FREE—Let us send you your first week's supply of POSTUM—FREE. Write for it to Consumer Service Dept., General Foods, Limited, Cobourg, Ont.

United Air Express

Will Cover United States and Part Of Canada

A unified air and air-rail express service covering the United States, with provision for Canadian facilities, and extending across the Pacific and to South America, was announced by L. O. Head, president of the Railway Express Agency, following a meeting with representatives of interested airlines in New York.

Twenty of the 23 domestic air lines in the United States and Pan American Airways have signed contracts with the Railway Express Agency for the service which is to be inaugurated February 1. A door-to-door pick up and delivery service is contemplated for 215 cities in the United States and Canada with a population of 400,000 and, through the Pan-American Airways system, with 32 foreign countries.

It was pointed out that the air express system, started in 1917, has grown until in 1935 2,400,000 pound miles were flown, handling an estimated total of 2,400,000 pounds of express.

Under the new set up a pound of express may be transported across the continent by any route for 96 cents a pound. The rate on the newly established line from California to Hawaii will be \$1.67 a pound.

Africa's Oldest Motor Car

The oldest motor car in Africa, a four-horsepower vehicle made in France in 1894, and still in "running order" has been presented to the Johannesburg municipal museum. The solid black tires are the original ones.

Little Helps For This Week

Behold God is my salvation, I will trust and not be afraid; for the Lord Jehovah is my strength and my song. He also is become my salvation. Isaiah 12:2.

Still heavy is thy heart. Still sinks thy spirit down? Cast off thy weight, let fear depart, And every care be gone.

Go on in all simplicity; do not be so anxious to win a quiet mind, and it will be all the quieter. Do not examine so closely into the progress of thy soul. Do not crave so much to be perfect, but let your spiritual life be formed by your duties and by the actions which are called forth by circumstances. Do not take overmuch thought for tomorrow. God who has led you safely so far will lead you on to the end. Be altogether at rest in the loving holy confidence which you ought to have in His heavenly Providence.

Trains Chickens For Movies

The lack of trained chickens in Hollywood gave Warren William an idea. The actor has established the film colony's first school for fowl which may be film-struck but a little shy about it. Thirty chickens have been started on a course of education which he believes will fit them for every demand of the movies.

Marie: "Are they in love?"

Marie: "They must be. She listens to him describe a ball game and he listens to her telling how her cousin's new dress was made."

Hard Year For Trappers

Far Catch Lower Than Last Season

That some season of relief for Indians and trappers operating in northern Saskatchewan fur lands will be essential unless trapping of beaver is made legal in the spring when the snows sounded in reports of hardship brought to civilization by Pilot Angus Campbell of the M. and C. Aviation Company.

With the fur catch estimated as between one-third and one-quarter of last winter, in itself considered a poor year, trappers are facing difficulties hitherto unencountered, he said.

Special Olympic Smokes

The Austrian tobacco monopoly also expects to profit from the Olympic games of this year, a report from Vienna states. It's just been announced that in honor of this sporting event smokers in Austria will be given a chance to smoke "Olympic cigars and cigarettes."

Mexico City got its name from the Aztec war god, Mexitli.

Instant Relief From ITCHING

Are you tormented with the itching tortures of eruptions, eczema, sores, rashes or other skin afflictions? For quick and happy relief use pure, cooling, antiseptic, liquid D. D. D. Prescription. Its gentle oils soothe the irritated and inflamed skin, thus aiding nature itself to heal the disorder. No fuss—no mess. Clear, grass-green and stainless—dries up almost immediately. Stops the most intense itching instantly. A 5¢ trial bottle, at drug stores, will prove it—or money back. D. D. D. Prescription is made by the owners of ITALIAN BALM.

Thursday, Jan. 23rd, 1936

Local News

Get your stationery and school supplies at the Chronicle office.
Mr. and Mrs. R. D. Sutherland are Calgary visitors today.

Hold everything for the Burns' Entertainment and Dance on Friday January 24th. Modern and Scottish dances.

Keep in mind the Annual Meeting of the Ratepayers on Friday evening Jan. 31st at 8 o'clock.

Chas. Whittaker of Bayport, Alta. is visiting friends and relatives in the district.

Fred Stevens was in Calgary on Wednesday attending the funeral of his old friend, Jesse Stewart.

Mr. and Mrs. Jim McCool and Lorne Nichol are Calgary visitors today.

The Band will hold their weekly practice at Wessex on Sunday at 11:00 a.m.

Mrs. Fred Pfeut of Carstairs visited friends here on Thursday last.

BORN—To Mr. and Mrs. Wilkinson, of Carstairs, on Jan. 21, a son, at the Crossfield Maternity Home.

Mrs. J. M. Williams, Miss Grace Williams, Mrs. Everett Bills, Norma, and Ross Bills, Norma Miller were city visitors Saturday.

We understand Gordon Purvis is taking a rink to the Edmonton Bouspiel which commences on Feb. 10th.

Chester Christiansen fell on the ice during a hockey game at the home of a neighbor last week, and broke his left wrist.

Mr. and Mrs. Pilledge and son, Mr. and Mrs. Carlstrom and son of Calgary spent the week-end at the home of Mr. and Mrs. Chas. Fox.

The Carstairs - Crossfield Band are sponsoring a Skating Party at the Carstairs Rink on January 30. Dance to band music.

W. A. Pryor, auditor of the M. D. of Rosebud, completed his audit and left for his home at Saskatoon on Monday evening.

The Crossfield and District Old Timers Association will hold their annual Round-up banquet, entertainment, and dance on Tuesday, February 18th.

Mr. and Mrs. Ed. Fox, Mrs. C. Fox, R. T. Amery and Dr. McClelland were Calgary visitors Monday and were all interested spectators at the bouspiel during the afternoon.

Gordon Purvis is in Calgary this week on jury duty. Gordon had a rink all ready for the Calgary bouspiel when he was summoned for jury duty. Glen Williams took over the skipping of the rink.

Mrs. Adam Cruickshank, Mrs. Archie McFadyen and Jim Cumming motored to High River on Wednesday. Miss Florence Cruickshank who has been visiting in High River is expected to return home with them today.

The annual meeting of the ratepayers of the Village will be held in the Fire Hall on Friday evening January 31st at 8 o'clock. Mr. ratepayer, this is your meeting and if you have anything on your chest this is the time to get it off.

Mr. and Mrs. W. H. Miller attended the annual convention of the Canadian Weekly Newspaper Association at Edmonton on Friday and Saturday. Mrs. Miller spent the week-end at Vegreville, returning home Wednesday.

The many friends of R. M. McCool will regret to know that he has been confined to his home for the past week with a severe attack of flu, and as a consequence Milt very reluctantly had to forego attending the U. F. A. Convention this week, and also to give up his position on the local MacDonald-Brier rink which is to play in the Southern Alberta curling championships at Calgary commencing on Friday.

15th. Canadian Light Horse

Lt. Col. J. T. Scott, Officer Commanding, 15th. Canadian Light Horse, Majors J. H. Beattie and P. P. Littlewood, Lieuts. Burton and Lasher and a party of N.C.O.'s and men visited the local Armoury on Thursday evening last.

A demonstration by the machine gun team under Lieut. Lasher showed efficiency and speed in mounting and dismounting the Vickers gun. (This team won the championship of Canada.)

A squad under Lieut. Burton gave an exhibition of troop and rifle drill.

Lt. Col. Scott gave a brief talk on the work of the Militia, and promised strong support for the establishment of a troop or squadron in Crossfield if sufficient recruits are obtained to make the effort worthwhile.

"A" Squadron 15th. C.L.H. has been in the Crossfield and Carstairs district nearly thirty years. The first O.C. was the late Lt. Col. R. L. Boyle.

FLASH—Archie McFadyen broke his right arm while cranking his car at 6.45 this evening [Thursday].

Midgets Drop Close Game to Calgary Club

The Crossfield Midget hockey team journeyed to Calgary on Saturday and lost a close, hard fought game by a score of 2-1 to the Ogilvie Midgets, coached by Bill Brooks.

The score is a good indication of the play. It was a bang up game that kept the fans on edge throughout.

The Crossfield team and supporters were royally entertained after the game by Mr. and Mrs. Brooks and parents of the players.

Crossfield - Warren Hall, Billy Amery, Kenneth Miller, Earl Hopper, Lorne Sharp, Johnnie Carmichael, George Fleming, Jack Williams, Jack Fleming.
Thanks of the Club is tendered to Messrs D. J. Hall, E. Bills, and R. T. Amery for furnishing transportation.

C. G. I. T. Notes

The C. G. I. T. held their regular meeting at the home of Norma Miller on Tuesday afternoon. President Cora Hall occupied the chair.

The next meeting will take the form of a social evening and will be held at the home of Arlene Amery on January 28th.

The C.G.I.T. under the capable leadership of Mrs. R. M. McCool have outlined a very active and interesting program for the year.

Following are the officers for 1936: President, Cora Hall; Vice-President, Arlene Amery; Secretary, Arlene Amery, Treasurer, Norma Miller. Executive Committee: L. Metherell, Jean Carmichael, Flower Committee: Lois Longmire, Clara Metherell.

With The Curlers

The Men's Curling Club has commenced a second square draw with the same rinks excepting the skips who were selected by lot to play on different rinks than those chosen by them at the start of the season.

This competition commenced on Tuesday night, 12 end games commencing at 8 o'clock.

Tuesday's results - Carmichael won from McCoskell and McMillan from McRory.

Wednesday's results - Cameron won from Russell, Outkes won from Williams.

The Crossfield rink competing in the Calgary bouspiel this week is doing fairly well and as this is written have won four and lost two games. Personnel of the rink: G. A. Williams, skip; Chas. Purvis, third, Carl Becker, second, Chas. Fox, lead.

It is expected that the MacDonald-Brier playdowns to decide the Southern Alberta winner will commence at Calgary on Friday of this week. Crossfield has a well balanced rink for this event, with Glen Williams skipping, Chas. McClelland, third, Austin Williams, second, and either Chas. Purvis, Chas. Fox or Carl Becker playing the leading role.

The change in the lead of this rink is made necessary owing to illness of Milt McCool.

Four local rinks took part in the Carstairs'spiel last week, only two getting into the play. Cameron landed a fourth in the Distributors. Gordon Purvis third in the Challenge. The MacDonald-Brier rink, strong on paper, failed to click and passed out of picture early in thespiel.

The cold spell of the past few weeks was broken on Sunday when it warmed up and has continued mild since.

Dog Pound Notes

Floyd Banta is suffering from bloodpoisoning which started from a burn on his arm.

Keep in mind the dance at the Old Dog Pound Hall on Friday, January 24th.

Miss Beulah and Cecil Buschert were visitors in Calgary Tuesday returning Wednesday.

Mrs. H. Stachwell was a Calgary visitor on Tuesday.

Miss Jessie MacKenzie was a visitor at her home on Sunday.

The Dog Pound Creek is beginning to overflow so it won't be long before another skating party will be held.

A Literary Meeting at Cremona last Saturday was quite largely attended. The next meeting will be held on Feb. 1st.

Of the average difference in price of cars in the U. S. and in Canada, of \$261, \$70 goes to the dealer, \$75 to the federal government in taxes and duty, \$62 in higher priced materials, and \$57 in factory costs, according to figures presented to the Tariff Board at Ottawa by the Canadian Automobile Chamber of Commerce.

Enlistment in the Militia calls for service in the defence of Canada only. Any citizen between the ages of 18 and 65 is liable to be called to defend his country if necessary. The only difference being that a man who has taken the trouble to train himself is that much better off should the occasion arise.

We would like to see all the young men in the district members of the local Squadron.

Church of the Ascension (ANGLICAN)

Sunday, January 26th.
